

1)

The output is "Poppy is 3 yo"

2)

- A. 3
- B. Meow
- C. Error because we're using a toString on "Arrays" when arrays is never declared as a variable or object, but you can import arrays, then you get "[Garfield the Cat, Lily the Dog]"
- D. Lily is fetching the ball!
- E. Poppy is fetching the ball!
- F. It gives an error because trainable is an interface is isn't a class/object to be declared
